The pectacle of President Buchanan lobbying for the Euglish Swindle, and freely using the influence and patronege of the executive office, to ensure the passage of the bill, must be eminent ly gratifying to all sincere admirers of Democratic institutions. The returns show that women attain a greater age than men. The native males live ten years more than fereign males, and American females twelve years more than their eleters from abroad. After giving a table showing the relations of oc-cupation to longevity, it is stated that— "It is now quite clear that in all civilized countries the average life of men is longhtoning; yet it may be doubtful whether cases of extreme longevity are on the increase. We have never

found any well authenticated case of a man reaching his two hundreth year." Farmers, chopers and lawyers show the great-est average age of death, while painters, ma-chouses and printers show the lowest average. Farmers die at 64; etcemakers at 43; printers at S6. A few Western and Southern buyers have arrived—among the latter are New Coleans and Nashville merchants—which look about quite leisurely, complaining the while of the low prices of produce, and above all, the difficulty of realizing on hills payable. And yet there is no gainsaying the fact, that a few large jobbiog, commission and importing houses, find already opening to them a trade greater it extent, and more safe and remunerative than they have done for years. The thorough weeding out which was experienced among the "middle houses" last fall, very naturally has produced this result. And still the aggregates of trade cannot but be moderate. It has been a marked and a moet important era in Masonary. Our own Lodges have increased from a handful to a mountain.
